

Cognitive Assessment Report

Your complete test results including IQ score, cognitive profile, global rankings, and detailed performance analysis.

Score based on [Raven's Progressive Matrices](#), standardized to the IQ scale (average: 100, standard deviation: 15).

BETTER THAN

96%

In a room of 100 people, you'd likely outperform 96% of them.

YOUR IQ SCORE

126

This places you in the 'above average' cognitive range.

ABOVE AVERAGE

+26

You scored 26 points higher than the general population average.

What does this mean?

Your IQ score of 126 means you performed better than approximately **96%** of the population. This is 26 points above the average IQ of 100. The blue dashed line on the chart shows where your score falls on the normal distribution curve.

Your Training Program is Ready

Built on your IQ results and cognitive profile, this program uses data from millions of test takers to help you improve reasoning, memory, and focus through short, high-impact exercises.

- ✓ Built from your IQ results and cognitive profile
- ✓ Challenges tailored uniquely to how you think
- ✓ Designed for efficient, long-term improvement
